Week 5 Homework

Damian, 22 years old, has just finished his electrical apprenticeship and is planning to leave his parents' home and move in with his girlfriend.

- a. Describe the predicted physical development of a male in Damian's stage of the lifespan.

A male in Damian's stage of the lifespan – early adulthood, would be expected to go through certain physical development milestones. These include reaching peak physical fitness, maximum muscle strength and endurance being reached, as well maximum physical coordination. Vision and other senses are at their peak, body goes into maintenance phase, maximum bone mass, height and bone growth has been reached

4 marks

- b. Identify examples in the case study that might have impacted on Damian's social development.

Living with his parents and having a girlfriend, doing an apprenticeship instead of going to university.

2 marks

- c. Select one of the examples from part (b) and explain how it might have affected Damian's social development.

Moving away from home and moving in with his girlfriend. Moving away from his family means he is not socialising with them as often and is learning how to fit into the role of partner, workman and colleague. He will have to learn the social behaviours of each role and will be socialising more due to the new roles
